

It's Yellow Jacket Season!

With summer winding down, yellow jackets are getting really ornery and stinging anyone that gets in their way.

Time Mist's Pro Exterminator Wasp, Hornet & Yellow Jacket Killer is a commercial formula that takes care of these pests on contact. It even reaches nests that are 20 feet above ground, ensuring that you can stay a safe distance away while applying it. This product can be used both indoors (attics and other places where nests are built and where food or feed are not exposed) and outdoors on their nests.

17.5 oz. aerosol can

TIPS & TECHNIQUES

A LIGHT FOR THOSE TIGHT SPACES

When you're doing a small repair job, a heavy lantern or a rolling flashlight can be more of an annoyance. Make a small, stable trouble light by plugging a night light into an extension cord. It lays flat, fits into small spaces, and offers a surprising amount of light to boot!

A KINDER, GENTLER PAIR OF PLIERS

Pliers are useful but they can also mark, dent, or abrade surfaces with their grip. For those delicate surfaces, cushion each jaw of the pliers with a finger cut from an old rubber glove, or wrap each jaw with a few layers of electrician's rubber tape. On even really delicate surfaces, fold a soft cloth until it is several layers thick and use that to cushion the pliers' grip.

CHISEL CARE

A way to keep chisels away from other tools is to protect their ends with slit tennis balls or hollowed-out pieces of cork.

THIRD HAND

Have you ever wished for another hand to hold small items that you're putting together or soldering? Make a convenient holder by wrapping a rubber band around the handles of a pair of long-nose pliers. It will pull the handles together, which will keep the jaws closed on the item you need held.

OUR LABOR DAY WEEKEND SCHEDULE

Saturday, August 30	OPEN
Sunday, August 31	Closed
Monday, Sept. 1	Closed

We wish you a safe and wonderful Labor Day!
