TIPS & TECHNIQUES

TOOL CLEAN UP

Joint taping tools and the like can rust very easily when not maintained properly. To protect them, wash and dry them thoroughly. Once they are completely dry, spray all metal parts with an all-purpose metal lubricant, like WD-40. The lubricant will make the tools easier to clean after the next use.

FIRM SCREWS

Before driving screws into plaster, dip them in water. The damp plaster will set up around the screw and hold it firmly in place.

STUD SHAVER FINDER

Dilemma—you need to find a stud, but have no stud finder. If you can get your hands on an electric shaver you are in luck! The tone of the razor's buzz will change when you pass over a stud.

WALL CLEANER

If you need to clean a wall and dread the thought of using harmful chemicals, try this: add ½ cup ammonia, ¼ cup white vinegar and ¼ cup baking soda to 1 gallon of warm water.

Bedbug Spray

- Kills bedbugs for up to 2 weeks
- Kills bedbugs and their eggs
